The Engineering 3/2 curriculum at Greenville College provides a three-year planned sequence of courses which permits a student to transfer to the College of Engineering at the University of Illinois or Washington University to complete requirements for the engineering degree in any one of the fields of engineering offered.

Note: Variations to this three year plan are likely as this is a *sample* course of study. You and your advisor will determine the course of study that works best for your specific situation. Please note transfer, dual, AP and CLEP credit; withdrawn or failed courses; and developmental courses are not accounted for in this plan.
